

--- PRESS RELEASE ---

--- FOR IMMEDIATE DISTRIBUTION ---

New Italian Reseller For WorkPLAN And WorkXplore

Vero Project S.r.l have been appointed Italian reseller for WoprkPLAN Solutions and WorkXplore. They are attending the forthcoming BIMU Tradeshow in Milan where they will present the software for the first time.

WorkPLAN Business Manager Teofilovic Violette says the company was ideal to become the reseller for both brands, as they already represent another Vero Software product, VISI, in Italy.

In addition to demonstrating VISI 21 on booth H22 in Pavilion 11 at the show from September 3 to October 4, Vero Project S.r.l will also feature WorkPLAN V5 and WorkXplore 3D V4.

WorkPLAN is a fully-scalable family of manufacturing software solutions, from project management to ERP, which enables custom manufacturers, project-based and make-to-order companies to automate and manage processes such as job costing, quotations, sales order processing, planning, quality, time, purchasing and stock management.

And WorkXplore 3D contains many features usually only found in CAD systems, enabling users to perform diagnostics, create assembly instructions and prepare the production of 3D models. The software contains numerous display and analysis tools, directly importing and analysing complex data from all major CAD systems, and generating a neutral format output.

Teofilovic Violette says one of Vero Project S.r.l's objectives at the exhibition will be to demonstrate how WorkXplore 3D has been integrated into WorkPLAN Solutions. Users find the integration, which allows direct linking between CAD files and the different WorkPLAN Solutions modules, saves them considerable time. "Version 5 of WorkPLAN establishes links with the Quotation module during a project's preliminary, preparative and costing phases.

Technical elements of bills of material making up the tree structure of an ordered part or tooling can then be developed and validated.

“The link with the 3D model file is maintained throughout the full WorkPLAN process for purchasing standard elements and consulting raw material suppliers. This guarantees traceability and ensures full integrity of the imported technical data.”

ENDS

Headquartered in England, Vero Software designs, develops, and supplies CAD/CAM/CAE software radically enhancing the efficiency of design and manufacturing processes, providing its customers with exceptional value through high productivity gains and significantly reducing time to market. The company's world-renowned brands include Alphacam, Cabinet Vision, Edgecam, Machining STRATEGIST, PEPS, Radan, SMIRT, SURFCAM, WorkNC and VISI, along with the production control MRP system Javelin. Despite the diversity of application, these solutions have one thing in common: they all address the rising challenges of achieving manufacturing efficiencies and bring huge value to the operations in which they are deployed.

Vero has direct offices in the UK, Germany, Italy, France, Japan, USA, Brazil, Netherlands, China, South Korea, Spain and India supplying products to more than 45 countries through its wholly owned subsidiaries and reseller network.

Vero is part of Hexagon (Nordic exchange: HEXA B), a leading global provider of design, measurement and visualisation technologies that enable customers to design, measure and position objects, and process and present data.
