

The benefits of relying on strategic partners

Vero Project: custom solutions for the 4.0 industry

Two partners - Antonio Perini and Roberto Clauser - and a company that was established in 2012 thanks to their 20-year experience in the precision mechanics' sector. Vero Project specializes in Erp solutions for the production management and for the interconnection to numerical controls of machine tools. "But above all, we offer software systems that fully meet the standards for the 4.0 industry and we are focussing to turnkey solutions, with a high rate of customization, able to guarantee a deep efficiency of the production cycle of our customers", the owners explained. 360-degree consultation is offered to the manufacturers

of any type of mould: depending on weaknesses or strengths, the professionals of Vero Project, from its offices in Brescia, Milano and Ancona, provide the most suitable software solution. "We are not just suppliers, but strategic partners, who are entrusted with the production numbers. For us, it is essential to guarantee a policy of confidentiality in the analysis and, above all, in the interpretation of data. Our added value is the connotation as an onestop-shop-provider: customers turn to a single interlocutor, without the need to resort to a number of different professionals." Vero Project has quadrupled its turnover in its 8 years of existence, expand-
